

## Correction Notice

*Handbook on Injectable Drugs, 17<sup>th</sup> Edition*, by Lawrence A. Trissel

Print edition ONLY. This correction notice applies only to the printed edition.

The publishers of the *Handbook on Injectable Drugs (HID), 17<sup>th</sup> Edition*, wish to inform you of an error in the esomeprazole sodium monograph. The concentrations of esomeprazole sodium in each of the three solutions tested in the solution compatibility table should have been 400 and 800 mg (Conc/L).

**This error affects all entries associated with reference 2760**, which are limited to the solution compatibility table of the esomeprazole sodium monograph. The corrected table follows:

Esomeprazole Sodium Monograph  
Solution Compatibility Table, pages 461-2.

### Esomeprazole sodium

| <i>Solution</i>              | <i>Mfr</i>      | <i>Mfr</i> | <i>Conc/L</i>  | <i>Remarks</i>  | <i>Ref</i> | <i>C/I</i> |
|------------------------------|-----------------|------------|----------------|---|------------|------------|
| Dextrose 5%                  | BA <sup>a</sup> | ASZ        | 400 and 800 mg | Physically compatible with less than 7% loss in 48 hr at room temperature and no loss in 120 hr at 4 °C           | 2760       | <b>C</b>   |
| Ringer's injection, lactated | BA <sup>a</sup> | ASZ        | 400 and 800 mg | Physically compatible with less than 4% loss in 48 hr at room temperature and little or no loss in 120 hr at 4 °C | 2760       | <b>C</b>   |
| Sodium chloride 0.9%         | BA <sup>a</sup> | ASZ        | 400 and 800 mg | Physically compatible with less than 3% loss in 48 hr at room temperature and about 1% loss in 120 hr at 4 °C     | 2760       | <b>C</b>   |

<sup>a</sup>*Tested in PVC containers.*

We urge you to correct these errors in all copies of *HID, 17th ed.* immediately and to communicate it to others on your staff who may use the book.
